INTRED

ABOUT iNTRED

We are a team of industry experts working with various prestigious organizations. With an aim to give back to society we have come up with a forum to Train and Educate people; which will make them Employable and Day One Productive.
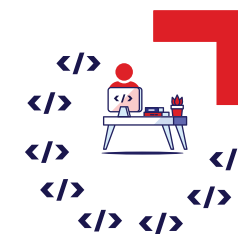

One should have ability to think Out of the Box with latest Technology and see project from a true Developer and Designer's view

At **iNTRED** we intend to prepare such resources which are updated with latest Technology & have complete 360 degree Practical Knowledge of Software Industry
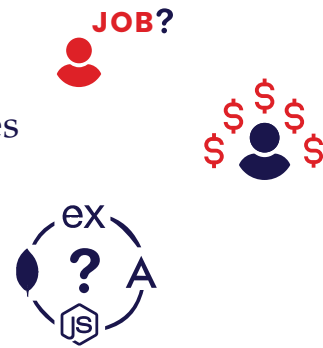

As we know that Industry requirements are growing and changing at very fast pace Theoretical knowledge will simply not be enough

Industry needs experienced and knowledgeable resources that are able to visualize projects till the end.

INDUSTRY CHALLENGES

- Freshers are not employable
- Higher cost for experience resources
- Training not available on " in use " Technology

JOB?

ex
?
A
JS

WHERE IS THE GAP

- Fast changing industry requirements
- No exposure to live project
- Adapting latest technology and processes

HOW TO BRIDGE

- Training, Training, Training
- Working on live projects
- Implementation using advance Technology

ex
A
JS

WHAT İNTRED HAS

360° COMPLETE TRAINING

- BUSINESS ANALYSIS
- PROJECT VISUALISATION
- PROJECT MANAGEMENT
- TEAM WORK
- BEHAVIORAL TRAINING
- IT CULTURE
- STANDARD PRACTICES
- CLIENT HANDLING
- REAL TIME PROJECT
- FULL SDLC EXPOSURE
- TECHNOLOGY UPGRADATION

- Placement assistance
- Technology upgradation
- Fast career growth
- Ample job opportunity
  with better packages

WHAT COMPANIES WILL GET

- Day one productive resources
- No investment in training
- Trained and Quality Resources
  available on low cost

MEAN STACK DEVELOPMENT

What Will I Learn?

Design and Develop Web Application & RESTful API with NodeJS

Develop front end application using Angular, HTML5 and CSS

Learn to design, create and interact with MongoDB database

Application Deployment and Continuous Integration Project

Management and Documentation Working with live projects

JAVA SPRING WEB DEVELOPMENT

### What Will I Learn?

Java Basics (classes/Object etc)	Introduction to Spring & workspace setup
Java basic language constructs	Spring Container, Dependency, and IOC
Enum and annotation	Spring configuration
Exception handling	Spring AOP
Java collection framework	Spring data access
Java concurrent framework	Spring MVC
Java streams	Spring Boot overview
Lamda & functional interface	
Joda time API	

MOBILE DEVELOPMENT USING REACT

What Will I Learn?

Create real-world native apps using React Native

Understand the terminology and concepts of Redux

Learn React design principles and methodologies

Prototype and deploy your own applications to the Apple and Google Play Stores

Discover mobile design patterns used by experienced engineers
